

Sensus Introduces the accuSTREAM Positive Displacement Meter
Expands selection of lead-free Sensus meters constructed with composite materials

Raleigh, N.C. (June 7, 2011) ... [Sensus](#) introduces the accuSTREAM™ meter, providing water utilities with a new option to continuously and affordably measure residential water use. The accuSTREAM meter applies proven positive displacement measuring technology and is the most recent lead-free water meter from Sensus, manufactured using composite materials.

Sensus continues to expand its line of composite water meters with the accuSTREAM meter, which complies with ANSI/NSF standards. The accuSTREAM meter includes patented bottom-plate technology for greater strength and a tamper-proof register assembly.

“Sensus is committed to bringing water utilities sustainable metrology products such as the accuSTREAM meter,” said Mike Tracy, executive vice president, Sensus North America.

“These products are just one way that Sensus can help support water utilities as environmental responsibility is increasingly mandated and the entire industry evolves the way it approaches intelligent water distribution systems.”

The accuSTREAM meter is a future-proof investment that can connect with most [advanced metering infrastructure](#) (AMI) and automated meter reading (AMR) systems to support intelligent and reliable remote management of water distribution networks. Utilities using an AMI system can access real-time, accurate data about consumption, reverse flow and leak detection. The accuSTREAM will be on display at Sensus booth #1026 at AWWA Ace 11 June 12-16.

About Sensus

Sensus is a leading utility infrastructure company offering smart meters, communication systems, software and services for the electric, gas, and water industries. Sensus technology helps utilities drive operational efficiency and customer engagement with applications that include advanced meter reading, data acquisition, demand response, distribution automation, home area networking and outdoor lighting control. Customers worldwide trust the innovation, quality and reliability of Sensus solutions for the intelligent use and conservation of energy and water. Learn more at www.sensus.com.
